PROFILE

Backend-focused software engineer with commercial experience in healthcare, defence and logistics. Builds APIs and full-stack applications with TypeScript, Node.js, Java and React, supported by automated testing and cloud delivery. Seeking long-term product ownership in an English-speaking team in the Utrecht region.

TECHNICAL SKILLS

Backend and data: TypeScript, Node.js, NestJS, Express, Java, REST, GraphQL, SQL, PostgreSQL, MongoDB

Frontend and mobile: React, Next.js, Angular, React Native, Flutter

Quality and delivery: Jest, Cypress, GitHub Actions, GitLab CI, Jenkins, AWS, Docker, Kubernetes

EXPERIENCE

Capgemini Engineering | Senior Software Engineer

Apr 2025 to Sep 2026

- Delivered short consulting engagements for clients including IKEA, Politie and ENGIE, adapting to different teams, codebases and requirements.
- Worked across backend and full-stack development with TypeScript, Node.js and Java; supported colleagues and mentored less experienced engineers.

ALTEN | Senior Full-stack Software Engineer

2024 | Healthcare consulting

- Designed and implemented AI-powered virtual patients for a medical-training platform sold to hospitals in France.
- Developed with React, Node.js, NestJS and Next.js, using MongoDB Atlas and AWS. Established Jest unit and integration tests in GitHub Actions.

Thales | Software Engineer

2023 | Consulting assignment

- Progressed from test automation into development on security-cleared defence software, using TypeScript, Node.js and Angular in a hexagonal architecture.
- Built and maintained Cypress and Jest tests within Jenkins delivery workflows.

CMA CGM | Full-stack Software Engineer

2022 | Consulting assignment

- Developed a Flutter application for container logistics monitoring alongside a Node.js and Angular web application; contributed to backend and delivery work with AWS, Docker, Kubernetes and GitLab CI.

Independent | Freelance Developer and Trainer

2018 to 2021

- Delivered applications, websites and automation for businesses, hospitals and schools; taught web development and engineering practices to students.

SELECTED PROJECT

PixelGuess | NestJS, GraphQL, PostgreSQL, React Native

Built a NestJS GraphQL API with PostgreSQL and Prisma, connected to an Expo/React Native client. Implemented server-controlled game state, signed image access with entitlement checks, and serializable transactions with retries. Added regression tests for concurrent actions and answer leakage. Local interview demo available.

EDUCATION AND CERTIFICATION

Epitech, Paris | Computer Engineering | 2022

Oracle Certified Associate | 2024

LANGUAGES

French: native | English: fluent | Dutch: basic, actively learning
