PROFILE

Software engineer since 2018, from freelance React websites to logistics, defence and conversational AI. I work mainly with TypeScript, Node.js and Java, alongside React and Angular. My experience spans development, testing, delivery and teaching.

EXPERIENCE

Capgemini Engineering | Senior Product Software Engineer

1 Apr 2025 - 1 Sep 2026

Netherlands | Client assignments including Thales, IKEA and ENGIE

- Joined for a Thales Netherlands assignment before moving to engagements for other Capgemini clients.
- Carried out technical audits, QA, test integration and DevOps work, mainly with Node.js and TypeScript, with Java and Python on some assignments.

ALTEN | Senior Product Software Engineer

2024

France | Client: Pitchboy, conversational AI for healthcare training

- Developed visual conversational agents for hospital training: first with React and Node.js / TypeScript, then a NestJS version sold to CHU Nice.
- Used AWS hosting, Jest tests and GitHub Actions for CI/CD.

Thales | Software Engineer

2023

France | NCOP team, defence software for NATO

- Developed defence software with Java, Angular and Node.js / TypeScript; completed a software delivery during the NCOP assignment in 2023.
- Contributed to test automation with Cypress and Jest within Jenkins delivery workflows.

GEFCO / CEVA | Full-stack Software Engineer

2022

France | Logistics, now part of CMA CGM Group

- Joined GEFCO in my first permanent engineering role in 2022. GEFCO was acquired by CMA CGM and later integrated into CEVA.
- Worked across a Node.js / TypeScript backend, Angular web frontend and Flutter mobile app, with Bitbucket CI/CD and occasional AWS tasks.

Independent | Freelance Developer & Trainer

2018 - 2021; later teaching assignments

France | React websites and technical teaching

- Started freelance development in July 2018, building React websites for restaurants, including QR-linked sites during the pandemic.
- Returned to freelance teaching between later assignments, giving classes at Epitech and in companies including Oxyl.

TECHNOLOGY EXPERIENCE

Professional development: TypeScript, Node.js, NestJS, Java, React, Angular, Flutter, Python

Professional delivery & quality: AWS, Bitbucket, GitHub Actions, Jenkins, Jest, Cypress, QA, CI/CD

Personal projects: NestJS, GraphQL, PostgreSQL, Prisma, React Native, Expo, Next.js, Bun

Continuing learning: Rust, Modern Java, AI coding tools

SELECTED PERSONAL PROJECT

PixelGuess API & mobile | AI-assisted development

A painting-recognition game with a NestJS GraphQL API, PostgreSQL / Prisma and an Expo / React Native client. Explores server-controlled game state, authenticated image access and transaction retries, with regression tests for concurrency and answer disclosure.

EDUCATION & LANGUAGES

Computer Engineering | Epitech, Paris | 2022

Oracle Certified Associate (OCA) | Oracle | 2024

French: native | English: fluent | Dutch: basic, actively learning
